WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

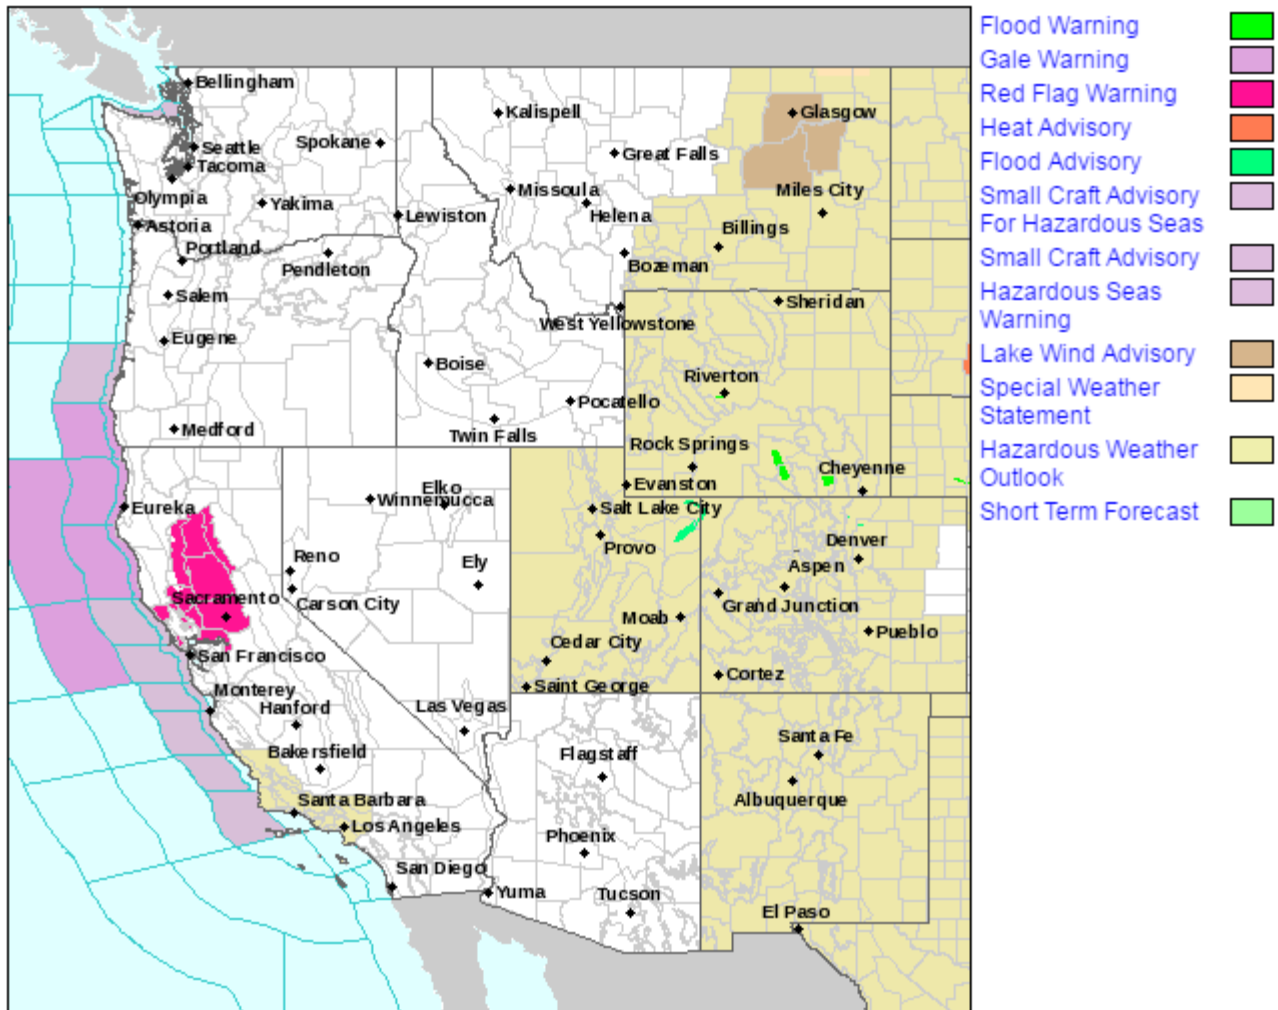

High Fire Risk in and Around the Sacramento Valley Today Due to Very Dry and Windy Conditions. One more mild and breezy day is in store for Northern California today. The low pressure trough responsible for this weather will move off to the east on Sunday. The northwest to northeast downslope surface wind pattern will continue in and around the Sacramento Valley until noon Sunday. The peak of this wind pattern will be this morning, with winds reaching 20-30 mph with gusts in wind-prone areas to 40 mph. RH there will drop to 10-17% this afternoon. Also, a weak low will be moving across Southern California with the trough this weekend, and enough moisture will wrap around it to bring a slight chance of some showers or isolated thunderstorms as far north as the Lake Tahoe area today and Sunday. Expect dry and warm weather late Sunday and Monday, another low pressure trough will drop south from the Gulf of Alaska on Tuesday with cool and breezy conditions through late in the week. There is a chance of showers and thunderstorms, mainly in northern portions of the region Wednesday and Thursday.

SOUTHERN CALIFORNIA

Significant heat wave possible starting next weekend. An unseasonably deep trough will remain over the area today and Sunday, resulting in cool temperatures with windy conditions in and near the deserts. Temperatures will be running 5-10 degrees below average over most lower elevations due to a deep marine layer and strong onshore flow. Expect highs this weekend to range from the 60s along the coast, 80s in the valleys and up to 95 in the low desert. West winds of 20-30 mph with higher gusts will be possible in the Kern County Mountains, Antelope Valley, Banning Pass and adjacent mountain areas. Instability aloft may allow for isolated showers to develop in the mountains of Southern California this afternoon. Isolated wet thunderstorms are a possibility around Kern County the next two days. The trough will depart the region early next week which will allow temperatures to warm a few degrees Monday and Tuesday. All long range models are now indicating a strong ridge over the Southwest will expand westward into Southern California next week. This may allow temperatures to soar to above 100 degrees in the valleys and lower foothills by next Saturday or Sunday. Minimum RH would likely fall into the single digits during the afternoon hours by then. No significant precipitation or offshore winds are expected the next 7-10 days.
